

ART ELECTRIC

55°

2-columns solution rectangular 3-stage

The 55 Stand is a break from convention, bringing in a whole new design. The traditional base is replaced with a diagonal strut, which placed high on the table leg, offers great stability. This airy solution helps to open up a room and give a feeling of more light and space.

We've also left an opportunity for a playful touch, as the base can be painted in a contrasting color to that of the inner tubes.

This stand has a integrated cable tray for hidden cable management.

Technical Specification

 Table top Width: 1600 mm Depth: 800 mm	 Stroke Length: 500 mm Diagonal: 490 mm Horizontal: 85 mm	 Tube dimensions 80x60, 70x50, 60x40 mm	 Load See specifications of your selected electronics
 Velocity See specifications of your selected electronics	 Height 640-1140 mm excl. feet and table top	 Large tube Down	 Noise level See specifications of your selected electronics
 Available electronics ECS+ ECS2	 Standard in    White Silver Black		

The diagonal strut gives great stability

2-stage solution with our unique glide system that never scratches paint
